

Clutch Booster for Enhanced Clutch Operation

This clutch booster enhances clutch operation by reducing the effort needed to depress the clutch pedal. It is engineered for durability, providing consistent clutch engagement and disengagement.

Product Overview

Enhanced Clutch Operation

This clutch booster is designed to provide enhanced clutch operation in automotive applications, assisting in reducing the effort required to depress the clutch pedal. It is engineered for durability and reliable performance, ensuring consistent clutch engagement and disengagement. Its robust construction withstands the demands of daily use, contributing to extended service life while improving overall clutch system efficiency.

Technical Specifications

Part Number	810-05003
Size	5 inch

Market Information

High Demand Regions	Southeast Asia, Philippines
