Product Overview

High-Performance Clutch Cover

This high-quality clutch cover pressure plate is engineered for optimal performance and durability in heavy-duty vehicle applications. Designed for consistent clamping force and smooth engagement, it ensures reliable power transfer and efficient operation under various driving conditions. Built with precision using high-grade materials, this component offers excellent heat resistance and wear characteristics, making it an ideal choice for OEM replacement and performance upgrades.

Technical Specifications

Dimensions	380 * 220 * 406.4 mm
Weight	25.93 kg
Structure Type	LS
Construction Materials	SPCD Steel, HT250 Pressure Plate

Compatibility

Compatible Models	MITSUBISHI FUSO 6D15(T)
OE Reference Numbers	MFC562, ME521151, ME520961

Quality & Standards

Certifications	IATF 16949:2016
Warranty Coverage	2 years or 50,000 km

Logistics & Terms

Delivery Lead Times

15 days

Sample Order

70 days

Bulk Order

Payment Terms

- 30% deposit, balance T/T before shipment
- L/C at sight

Minimum Order Quantity

50 pcs
