

Clutch Cover Pressure Plate

This high-quality clutch cover pressure plate is engineered for optimal power transfer and durability. It provides consistent clamping force, ensuring smooth and reliable engagement.

Product Overview

High-Performance Clutch Cover

This high-quality clutch cover pressure plate is engineered for optimal power transfer and consistent clamping force in heavy-duty applications. Designed with precision-machined materials including SPCD steel and HT250, it offers exceptional resistance to wear and heat. It is a reliable solution for various commercial vehicle models, ensuring smooth engagement and extended service life under demanding driving conditions.

Technical Specifications

Dimensions	430*235-450
Structure Type	DTP
Weight	35.58 kg
Materials	SPCD steel, HT250 pressure plate, 50CrV4 diaphragm spring

Compatibility

OE Numbers

- 3482 083 041
- 3482 083 219
- 3482 083 038
- 143 0347 10

Compatible Vehicle Models

- MAN NL / SU / UL / LU / F2000 / M90 / F90 / LION
- ASTRA HD 7 / HD 8
- DAF 85 / 95 / XF / CF
- KAMAZ 6
- IVECO TURBO STAR / EURO STAR
