

Clutch Disc Assembly

This clutch disc assembly is designed for optimal power transfer and durability. Its robust friction material ensures enhanced grip, while the sprung hub provides effective vibration damping for smooth engagement and disengagement.

Product Overview

High-Performance Clutch Disc Assembly

This high-performance clutch disc assembly is engineered for optimal power transfer and exceptional durability in demanding environments. Featuring robust friction material for enhanced grip and a precision-engineered design, it ensures smooth engagement and disengagement during operation. Equipped with a sprung hub for effective vibration damping, this assembly is the ideal choice for heavy-duty applications and performance vehicles requiring reliability and longevity.

Technical Features

Key Features

- Robust friction material for enhanced grip
- Sprung hub design for vibration damping
- Precision-engineered for smooth operation
- Suitable for heavy-duty applications

Application Suitability

Heavy-duty, Performance Vehicles
