

Clutch Disc AVW-18

This clutch disc is designed for optimal power transfer and durability. It features a robust friction material for enhanced grip and heat resistance.

Overview

High-Performance Clutch Disc

The AVW-18 clutch disc is engineered for optimal power transfer and superior durability in demanding automotive applications. Featuring robust friction material, this component ensures enhanced grip and exceptional heat resistance for reliable performance. It is designed with a sprung hub to provide effective vibration damping, resulting in smoother engagement and an extended service life.
