

Clutch Disc AVW-20

This clutch disc is engineered for optimal power transfer and durability. Its robust friction material provides enhanced grip and reduces slippage.

Product Overview

High-Performance Clutch Disc

The AVW-20 is a high-performance clutch disc engineered for optimal power transfer and superior durability. It features robust friction material designed to enhance grip and significantly reduce slippage during operation. This component is built for smooth engagement and an extended service life, making it a reliable choice for various vehicle applications.

Technical Specifications

Model Number	AVW-20
Component Type	Clutch Disc

Key Features

Performance Attributes	High-performance, Enhanced grip, Reduced slippage, Smooth engagement, Extended service life
