

Clutch Disc for Auto Transmission Systems

This clutch disc is designed for optimal power transfer and durability. It features a sprung hub to dampen torsional vibrations and robust friction material for enhanced grip.

Product Overview

High-Performance Clutch Disc

This clutch disc is engineered for optimal power transfer and long-term durability in automotive transmission systems. It features a robust friction material designed for enhanced grip and consistent performance under load. With a sprung hub to dampen torsional vibrations and a precision-engineered spline for a secure fit, this component ensures reliable operation across a range of vehicle applications.

Technical Features

Key Technical Features

- Robust friction material for enhanced grip
- Sprung hub design for vibration dampening
- Precision-engineered spline for secure fitment
- High-performance power transfer capability

Performance Attributes

High-Performance, Durable, Vibration Dampening, Secure Fit
