

Clutch Disc

This clutch disc is designed for optimal power transfer and durability. It incorporates a sprung center for vibration dampening and a high-strength hub for reliable performance.

Product Overview

High-Performance Clutch Disc

The AVW-19 clutch disc is engineered for optimal power transfer and long-term durability in demanding automotive applications. It features a robust friction material designed for consistent engagement and a sprung center hub to effectively dampen vibrations during operation. Built to meet or exceed OEM specifications, this component ensures reliable performance and a precise fit for compatible vehicle systems.

Technical Specifications

Key Features

- Robust friction material
- Sprung center for vibration dampening
- High-strength hub construction

Model Number	AVW-19
Compliance	OEM Specification Compliant
