Product Overview

High-Performance Braking Upgrade

This CNC aluminum rear disc brake assembly is specifically engineered for custom tuning requirements. It significantly enhances stopping power and vehicle control through precision-machined components designed for durability and weight reduction. The comprehensive kit ensures a direct fitment for optimized braking performance on compatible motorcycle frames.

Technical Specifications

Included Components

- Brake Disc
- Brake Caliper
- Mounting Bracket
- Brake Pads
- Installation Hardware

Material	CNC Machined Aluminum
----------	-----------------------

Vehicle Compatibility	DAX Style Motorcycles
-----------------------	-----------------------

Performance Features

Performance Advantages	Enhanced Stopping Power, Weight Reduction, Precision Engineering, Improved Control
------------------------	--
