

CNC Boring and Milling Machine

This CNC boring and milling machine is designed for precision machining of large and heavy workpieces. It features a robust structure, high rigidity, and an advanced CNC control system for accurate and efficient material removal.

Overview

High-Precision Boring and Milling Capability

The TK6916 x 10 is a high-performance CNC boring and milling machine engineered specifically for the precision machining of large and heavy workpieces. It features a robust, high-rigidity structure paired with an advanced CNC control system to ensure efficient material removal and consistent accuracy. Designed for versatility, this machine supports a wide array of operations including boring, milling, drilling, and tapping across demanding sectors like aerospace and heavy machinery.

Key Features

Target Industries

Aerospace • Automotive • Heavy Machinery

Machining Operations

Boring, Milling, Drilling, Tapping

Technical Specifications

Performance Highlights

160 mm

Boring Spindle Diameter

10 m

Travel Range
