

# CNC Drilling and Tapping Center with 8-Tool Magazine

The CNC drilling and tapping center features an 8-tool magazine for efficient tool changes. It is capable of processing high-precision parts to meet varied customer needs.

## Overview

### High-Efficiency Machining Center

This CNC drilling and tapping center is engineered for high-precision part processing, featuring a versatile 8-tool magazine to accommodate diverse customer requirements. The machine utilizes a vertical processing center design, offering a compact layout and superior structural rigidity. Constructed from high-quality, anti-stress cast iron, the framework ensures long-term stability and performance for demanding metalworking applications.

## Technical Specifications

Tool Magazine Capacity	8 tools
Design Configuration	Vertical Processing Center
Frame Material	High-quality anti-stress cast iron

## Key Features

### Performance Metrics

**8 tools**  
Tool Capacity

Capabilities	Drilling, Tapping, Light Milling, High-Precision Machining
