

CNC Lathe for Metal and Plastic Machining

This CNC lathe is designed for machining metal and plastic components with precision. Its compact footprint and enclosed workspace make it suitable for small to medium production runs.

Overview

Precision Machining Capability

This CNC lathe is engineered for the precise machining of both metal and plastic components. Its compact footprint makes it an ideal solution for small to medium-sized production runs across various industrial applications. Featuring an enclosed workspace for enhanced operator safety and an integrated digital display, this machine ensures reliable and efficient operation.

Technical Specifications

Application

Small-scale production • Medium-scale production

Model Number	CK6130
Compatible Materials	Metal, Plastic

Features

Safety & Control

- Enclosed workspace
- Digital operation monitor
