

CNC Lathe for Precision Machining

This CNC lathe is designed for machining a variety of materials. It features a robust frame, a high-speed spindle, a user-friendly control panel, and a multi-tool turret, and it is suitable for small to medium-sized production runs.

Overview

Precision CNC Lathe

This CNC lathe is engineered for high-precision machining across a variety of materials, making it an ideal choice for small to medium-sized production runs. Featuring a robust frame and a high-speed spindle, the machine ensures stability and performance during operation. It includes a multi-tool turret for efficient material removal and an integrated coolant system to maintain optimal temperatures.

Technical Specifications

Suitable Production Scale

Small production runs • Medium production runs

Model Number	CK6130A
Key Features	High-speed spindle, Multi-tool turret, Integrated coolant system, Robust frame design
