

CNC Lathe with Hard Guide Way

This CNC lathe features a whole bed hard guide way for enhanced stability and precision. It offers versatile machining capabilities for various metalworking applications and ensures long-term reliability.

Product Overview

High-Precision CNC Lathe

This industrial-grade CNC lathe is engineered with a whole bed hard guide way design to ensure maximum stability and operational accuracy. It features a robust construction built for long-term reliability and consistent performance in demanding metalworking environments. Designed with user safety in mind, the machine includes an integrated safety enclosure with a clear viewing window to facilitate efficient and secure production processes.

Performance Metrics

Core Advantages

High Precision, Hard Guide Way, Robust Construction, Versatile Machining

Design and Safety

Safety Equipment

- Full safety enclosure
- High-visibility viewing window

Control System

Control System Type

User-friendly CNC control system
