

CNC Lathe

This high-precision CNC lathe is designed for machining various materials with accuracy and efficiency. It features a robust construction and advanced control system for optimal performance in diverse machining applications.

Product Overview

High-Precision CNC Lathe

This high-precision numerical control lathe is engineered for machining a wide variety of materials with exceptional accuracy and efficiency. Featuring a robust construction and an advanced control system, it provides a user-friendly interface designed for optimal performance in demanding industrial environments. It is a versatile solution suitable for a range of essential machining operations, including turning, facing, threading, and drilling.

Technical Specifications

Key Features

- High-precision machining capability
- Robust construction for stability
- Advanced numerical control system
- User-friendly interface

Model Number	CK6136-750
Machining Operations	Turning, Facing, Threading, Drilling
