

# CNC Machine ER Collet Nut

Precision-engineered ER nut designed for CNC tooling applications. It provides secure and accurate clamping for ER collets, ensuring optimal performance and reduced vibration during high-speed machining operations.

## Product Overview

### Precision ER Collet Nut

This precision-engineered ER nut is designed specifically for CNC tooling applications, providing secure and accurate clamping for ER collets. Its robust construction ensures optimal performance and significantly reduced vibration during high-speed machining operations. Manufactured from high-grade materials, this component is built for durability and a long service life in demanding industrial environments.

## Technical Specifications

Clamping Type	ER Collet
Series	R32-UM
Primary Application	CNC Machining, High-Speed Machining, Tool Holding
