

CNC Machine Tool Control Panel

This CNC control panel is designed for machine tools. It features a user interface with a display screen and function keys for precise control and monitoring.

Product Overview

Industrial CNC Control Interface

This CNC machine tool control panel is engineered for precise industrial machining operations. It features a dedicated user interface that provides real-time monitoring of axis coordinates, program status, and operational metrics. Designed for reliability, the panel includes an integrated numeric keypad and comprehensive function buttons to streamline machine control and programming tasks.

Technical Specifications

Control Features

- X and Z axis coordinate monitoring
- Real-time program status display
- Integrated numeric keypad
- Dedicated function keys for machine operation
- Programming interface

Operational Metrics

430 pcs

Workpiece Count

92.2 hours

Processing Time

Application

Application Type

CNC Machining, Industrial Automation, Precision Control
