

# CNC Machined Aluminum Deep Drawing Parts

These CNC machined aluminum parts are manufactured using 3D deep drawing techniques. They are ideal for applications requiring lightweight, durable, and custom-shaped components with tight tolerances.

## Product Overview

## Professional CNC Machining & Deep Drawing Services

We provide high-precision CNC machined aluminum parts featuring complex 3D deep drawing designs. With over 8 years of industrial experience, we specialize in delivering custom components with tight tolerances of  $\pm 0.005\text{mm}$ . Our comprehensive services range from rapid prototyping to full-scale production, ensuring high-quality results for diverse industrial applications.

## Technical Specifications

### Machining Tolerance

**0.005 mm**

Precision Tolerance

### Processing Capabilities

- CNC Turning
- Deep Drawing
- Cutting
- Polishing
- Nickel Plating
- Chrome Plating
- Zinc Plating

### Production Equipment

- CNC Lathe
- Automatic Lathe
- Normal Lathe
- Advanced Fitting Tools
- Precision Fixtures

### Available Materials

Aluminum, Stainless Steel, Carbon Steel, Brass, Alloy Steel

## Quality & Compliance

### Certifications

ISO 9000 • SGS • 100% QC Inspection

## Service & Support

### Our Service Commitment

- 24-hour response time
- Customized design development
- Free repairs for manufacturing defects
- On-time delivery guarantee
- OEM/Drawing-based manufacturing

## Trade & Logistics

### Payment Terms Accepted

T/T ,L/C , Western Union , Paypal Apple Pav .Online Pavment etc .

### Order Information

Parameter	Details
Minimum Order Quantity	1000 pcs
Lead Time	4-12 days (General)
Payment Terms	50% Deposit, 50% Balance
Origin	China

### Shipping Priority

- 0-100kg: Express & Air Freight
- >100kg: Sea Freight
- Customized specifications accepted

### Accepted Payment Methods

T/T, West Union, PayPal, L/C, Apple Pay
