

CNC Metal Laser Cutting Service

Provides precision CNC laser cutting services for metal components. Material options include steel, aluminum and stainless steel.

Service Overview

High-Precision Metal Fabrication

We provide custom, high-precision CNC metal laser cutting and sheet metal fabrication services tailored for industrial applications. Our facility is equipped with advanced high-power laser technology, enabling us to process complex geometries with tight tolerances and smooth edge finishes. With extensive experience serving international markets, we deliver reliable, efficient manufacturing solutions for prototypes and custom components.

Service Capabilities

Equipment Highlights

- 15000KW High-Power Laser Cutting Machine
- 4m / 6m Plate Shearing Machines
- Bending Machines
- CNC Machine Tools

Laser Cutting Power

15000 KW
Max Laser Power

Core Processing Methods

Laser Cutting, Sheet Metal Fabrication, Riveting, Welding

Operational Details

Facility Area	6000 sqm
Years in Operation	16 years

Market Reach

Export Markets

Europe • America • Japan • Korea
