

CNC Metal Sheet Shearing Machine

This CNC metal sheet shearing machine is designed for efficient and accurate cutting of metal sheets. It features automated operation and a robust construction for high-volume industrial use.

Overview

High-Precision CNC Metal Shearing

The MS7 series CNC swing shear is engineered for professional metal fabrication, offering precise and efficient cutting of metal sheets. Featuring a CNC-controlled back gauge and manual blade clearance adjustment, this machine ensures high accuracy for industrial applications. Its robust construction and automated lubrication system provide long-term reliability for high-volume production environments.

Technical Capabilities

Shearing Capacity

6 mm

Max Thickness

3200 mm

Max Length

Control System

Back Gauge Control

CNC Controlled

Operation & Maintenance

Blade Clearance Adjustment

Manual

Lubrication

Automatic lubrication for moving parts

Configuration Options

Optional Equipment

- Pneumatic material support device

Safety & Stability

Safety and Stability Systems

Protective Barriers, Emergency Stop, Adjustable Supports, Leveling Feet

Technical Specifications

Machine Specifications

Parameter	Value
Series	MS7
Model Reference	MS7-6X3200
Shear Type	Swing Shear
