

CNC Plasma Cutting Machine for Metal Fabrication

This precision CNC plasma cutting machine is designed for industrial applications. It offers high-speed, accurate cutting of various metals and features a robust frame and advanced control system.

Product Overview

Industrial CNC Plasma Cutting System

This high-precision CNC plasma cutting machine is engineered for demanding industrial metal fabrication environments. It delivers exceptional speed and accuracy, making it an ideal choice for manufacturing, prototyping, and complex fabrication tasks. The integrated system design ensures operational efficiency and a safer workspace through built-in fume extraction capabilities.

System Features

Integrated Components

- Plasma cutting torch
- Advanced CNC control console
- Industrial-grade cutting table
- Integrated fume extraction unit

Design Highlights

Robust Frame • High-Speed Operation • Precision Cutting • User-Friendly Interface

Suitable Applications

Metal Fabrication, Industrial Manufacturing, Prototyping
