

CNC Precision Lathe

This precision numerical control lathe is designed for high-accuracy machining operations. It features a robust construction, advanced control system, and a user-friendly interface for efficient programming and operation.

Overview

Precision Machining Excellence

This CNC Precision Lathe is engineered for high-accuracy machining operations across a wide range of industrial applications. It features a robust construction paired with an advanced control system, ensuring exceptional performance and long-term reliability. Designed with a user-friendly interface, the machine facilitates efficient programming and operation, while integrated safety features and optimized maintenance protocols support a productive workflow.

Technical Specifications

Design & Control

- Robust construction for stability
- Advanced numerical control system
- User-friendly programming interface
- Optimized for ease of maintenance

Machining Capabilities

High-accuracy, Multi-material compatible, Numerical control

Safety & Compliance

Safety Features

Integrated safety systems • Operational reliability
