

# CNC Router Table Dust Shoe with Brush Skirt

This CNC dust shoe is designed for router tables and CNC machines. It features a brush skirt to effectively contain dust and debris during routing operations.

## Product Overview

### Efficient CNC Dust Collection

This CNC router dust shoe is an essential accessory for maintaining a clean and safe working environment. Designed to attach directly to the spindle, it moves in tandem with the cutting tool to effectively capture chips and dust at the source. By integrating with your existing dust extraction system, this unit helps prolong the lifespan of your machine and protects worker health by minimizing airborne debris.

## Technical Specifications

### Dust Collection Outlets

- 1
- 2

### Compatible Spindle Diameters

65mm, 80mm, 100mm, 105mm, 125mm

### Dust Boot Outlet Diameters

80mm, 100mm

## Features

### Key Benefits

Improved Air Quality • Extended Machine Life • Easy Maintenance • Effective Debris Containment
