

# CNC Vertical Machining Center

This CNC vertical machining center is designed for metal cutting operations. It features a fully enclosed structure with transparent doors and a numerical control panel.

## Overview

### High-Precision Vertical Machining Center

This CNC vertical machining center is engineered for demanding metal cutting operations, offering high precision and reliability. The unit features a fully enclosed structure with transparent doors, allowing for safe and easy monitoring of the machining process. Equipped with an advanced numerical control panel, it supports complex programming and efficient operation for a wide variety of industrial machining applications.

## Technical Specifications

### Primary Applications

- Metal cutting operations
- Precision machining
- Industrial manufacturing

Model	KX-L1060
Machine Type	Vertical Machining Center
Safety & Design	Fully Enclosed, Transparent Viewing Doors, Numerical Control Panel
