

CNC Vertical Turning and Milling Center CXK200

The CNC vertical turning and milling center CXK200 is designed for precision machining of large and complex parts. It features a robust structure for high stability and accuracy during heavy-duty cutting operations.

Overview

Precision Machining Excellence

The CXK200 is a high-performance CNC vertical turning and milling center engineered for the precision machining of large and complex components. Its robust vertical configuration ensures exceptional stability during heavy-duty cutting operations while optimizing floor space and simplifying workpiece handling. Equipped with a high-speed spindle and advanced multi-axis control, this machine delivers the versatility and efficiency required for demanding sectors like aerospace, automotive, and energy.

Key Features

Target Industries

Aerospace • Automotive • Energy

Capabilities

Vertical Turning, Milling, Heavy-duty Cutting, High-speed Machining

Technical Specifications

Design Advantages

- Robust structure for high stability
- Vertical configuration for floor space optimization
- Intuitive CNC control panel
- Easy loading and unloading of workpieces

Machine Type

CNC Vertical Turning and Milling Center
