

CNC Vertical Turning and Milling Center CXK250

This CNC vertical turning and milling center is designed for precision machining of large and complex parts. It features a robust structure for high stability and accuracy during heavy cutting operations.

Overview

Precision Machining Excellence

The CXK250 is a high-performance CNC vertical turning and milling center engineered for the precision machining of large and complex components. Featuring a robust, stable structure, it excels in heavy-duty cutting operations while maintaining exceptional accuracy. With an integrated multi-axis control system and automatic tool changer, this machine delivers superior efficiency for industries such as aerospace, automotive, and energy.

Key Features

Productivity Enhancements

- High-speed spindle
- Automatic tool changer (ATC)
- Integrated CNC control panel
- Chip conveyor system

Machining Operations

Turning, Milling, Drilling, Tapping

Performance

Performance Highlights

1 Multi-axis
Control System

Application

Suitable Industries

Aerospace • Automotive • Energy
