

# CNC Wood Lathe with Double Knives and Engraving Spindle

This CNC wood lathe features a cast iron machine body for enhanced stability. It utilizes a step motor and driver for precise movement.

## Overview

### CNC Wood Lathe with Double Knives and Engraving Spindle

This high-performance CNC wood lathe features a robust cast iron body for enhanced stability during operation. Equipped with double knives and an additional engraving spindle, it is designed for precision turning and intricate carving tasks. The machine utilizes high-quality components, including Yako 2811 drivers and a Best inverter, ensuring reliable and consistent production for furniture components and decorative wood projects.

## Technical Specifications

Model	KC1530-S
Max Working Diameter	300 mm
Max Working Length	1500 mm

## Components & Performance

### Inverter

**3.7 kW**  
Power

Driver Model	YAKO 2811
Motor Type	Stepper 450B

## Mechanical System

Drive System	HIWIN rack & pinion
Rail Guide	HIWIN 25#
Slider	Flange

## Logistics & Support

Software	JD Paint
Delivery Time	15 days
Payment Terms	30% TT in advance, balance before shipment
