

# CNC Wood Router for Furniture and Cabinets

This CNC wood router is designed for woodworking applications such as creating wooden doors and cabinets. It is suited for hard wood working, like cutting and engraving on rosewood for furniture and indoor decoration.

## Overview

### Professional CNC Woodworking Solution

This high-performance CNC Wood Router is engineered for demanding woodworking applications, including furniture manufacturing, cabinet making, and indoor decoration. Featuring robust construction and a precise control system, it is optimized for mass production and detailed craftsmanship on materials like rosewood and other hardwoods. The inclusion of multiple high-speed spindles and an integrated dust collection system ensures both efficiency and a clean, professional working environment.

## Technical Specifications

### Spindle Configuration

**4.5 kW**

Spindle Power

**3 units**

Number of Spindles

### Core Capabilities

Cutting, Engraving, Carving, High-speed material removal

## Features

### Key Features

- Integrated dust collector system
- High-precision CNC control system
- Robust heavy-duty construction
- Large-format worktable for varied panel sizes
