Overview

High-Precision CNC Wood Turning Lathe

The KC1530-S is a professional-grade CNC wood turning lathe designed for high-efficiency production of intricate woodworking projects. Equipped with both a lathe cutter and a carving spindle, it offers versatility for creating detailed spindles, furniture components, and decorative art. This robust machine utilizes advanced control systems and high-quality components to ensure precision, reliability, and consistent output for complex turning operations.

Technical Specifications

Max Working Diameter	300 mm
Max Working Length	1500 mm
Control System	DSP
Compatible Software	CAD, JDpaint

Hardware Components

Inverter	Fuling 4KW
Driver	YAKO 2811
Motor	Stepper 450B
Drive Type	HIWIN rack & pinion
Rail Guide	HIWIN 25#

Dimensions and Weight

Weight

1550 kg

Net Weight

1600 kg

Gross Weight

Packing Dimensions

3100 x 1200 x 1600 mm
