

CNC Woodworking Machine

This high-precision CNC woodworking machine is designed for intricate and efficient wood processing. It features a robust frame, advanced control system, and a large working area for versatile applications.

Product Overview

Professional CNC Woodworking Solution

The MXK5813 x 25A is a high-precision CNC woodworking machine engineered for efficiency and complex wood processing tasks. Its robust frame construction ensures stability during high-speed operations, while the advanced control system delivers exceptional accuracy for detailed carving and furniture manufacturing. Designed for versatile industrial applications, this machine enables users to achieve intricate designs with professional-grade speed and consistency.

Technical Specifications

Model Number	MXK5813-25A
Machine Type	CNC Router / Milling Machine
Core Capabilities	High-Precision, Intricate Carving, Furniture Components, Industrial Processing
