

CNG Dispenser for Refueling Stations

This dispenser provides a reliable solution for dispensing compressed natural gas. It features a user-friendly interface and durable construction for accurate and efficient fuel delivery.

Product Overview

High-Performance CNG Dispensing Solution

This compressed natural gas dispenser is designed for high-traffic refueling stations, offering a robust and reliable solution for fuel delivery. It features a user-friendly interface equipped with a clear display and an integrated keypad to ensure accurate and efficient operation. Built with durable construction, this unit is engineered to meet the demanding needs of professional refueling environments.

Interface & Operation

User Interface

- Green digital display
- Integrated keypad for input
- Intuitive operator interface

Technical Capabilities

Fuel Type

CNG • Compressed Natural Gas

Application

High-traffic refueling stations

Design & Build

Construction

Durable and robust housing

Key Features

Accurate Delivery, Efficient Operation, Reliable Performance
