

# CO2 Laser Cutting Machine for Wood

This CO2 laser cutting machine is designed for cutting wood and other non-metal materials. It has a 1300X2500mm working area and comes with Laserwork software.

## Product Overview

### High-Precision CO2 Laser Cutting Solution

This advanced CO2 laser cutting machine is engineered specifically for precision work on wood and various non-metal materials. It features a robust, industrial-grade frame and a high-efficiency laser tube to ensure clean, accurate cuts for every project. With an integrated, user-friendly control interface, operators can easily adjust parameters to suit diverse applications including custom woodworking, detailed signage, and intricate craft production.

## Technical Capabilities

### Key Features

- High-precision laser cutting
- Robust structural frame
- Advanced control system
- User-friendly interface

### Supported Materials

Wood, Non-metal materials

## Application Areas

### Ideal Use Cases

Woodworking • Signage Production • Crafting
