Product Overview

High-Performance CO2 Laser System

The LX-1390 CO2 laser cutting machine is a robust industrial solution designed for high-precision cutting and engraving across a variety of materials. Featuring a large working area and advanced laser scanning technology, it delivers exceptional speed and accuracy for professional applications. With a long-lasting laser source and minimal maintenance requirements, this machine offers a reliable and cost-effective workflow for commercial production environments.

Key Performance Metrics

Max Marking Speed

7000 mm/s

Max Speed

Repeat Precision

0.002 mm

Repeat Precision

Technical Specifications

Model	LX-1390
Working Area	1300 x 900 mm
Available Laser Power	40W, 60W, 80W, 100W
Laser Type	CO2 Sealed Laser Tube, 10.6um
Cooling System	Water Cooling
Working Table	Stainless steel and knife table
Scanning Precision	4000 DPI

Operational Details

Min. Character Size

Language	Size
Chinese	2.0mm x 2.0mm
English	1.0mm x 1.0mm

Laser Output Control	0-100% (Software controlled)
