

Coal Mining Shearer Machine

The shearer machine is a heavy-duty piece of mining equipment designed for efficient coal extraction. It features a robust cutting head with multiple picks for breaking up coal seams.

Overview

High-Performance Mining Solution

The MG132/310-BW is a heavy-duty coal mining shearer engineered for continuous and efficient extraction in demanding underground environments. Featuring a robust cutting head with specialized picks, this machine is designed to break through coal seams with precision. Its integrated hydraulic system powers both the cutting drum and the reliable crawler track system, ensuring consistent performance and high productivity in longwall mining operations.

Performance Metrics

Model Identifier	MG132/310-BW
Key Features	Heavy-Duty, Crawler Track System, Longwall Mining, Hydraulic Powered

Technical Details

Machine Components

- Robust cutting head
- Multi-pick cutting drum
- Hydraulic traction system
- Crawler track maneuverability
