

Coarse Tooth Metal Saw Blade

Circular metal saw blade designed for cutting metal materials, featuring coarse teeth for an aggressive cutting action. Constructed from high-speed steel (HSS), the blade is suitable for use in power tools and machinery for metalworking applications.

Product Overview

High-Performance Cutting Solution

This circular saw blade is engineered specifically for efficient metal cutting applications. Featuring a coarse tooth design, it provides aggressive cutting action suitable for demanding metalworking tasks. Constructed from high-speed steel (HSS), the blade offers superior durability and heat resistance, ensuring consistent performance over time.

Technical Specifications

Material	High-Speed Steel (HSS)
Tooth Configuration	Coarse

Compatibility

Compatible Equipment

- Power Tools
- Metalworking Machinery

Suitable Materials	Ferrous Metals, Non-Ferrous Metals
