

Coated Stainless Steel Cable Ties

These cable ties are made from stainless steel and coated with a protective layer. They feature a self-locking mechanism for secure bundling in a variety of applications.

Product Overview

High-Performance Coated Cable Ties

These coated stainless steel cable ties are designed for demanding environments where corrosion resistance and secure fastening are paramount. Featuring a self-locking mechanism and high-quality coating, they provide excellent protection against abrasion and environmental factors. Ideal for bundling cables, securing hoses, and general organization, these ties offer a reliable solution for professional B2B applications.

Material Specifications

Primary Material	100% Nylon 66 (PA66)
Body Material	Stainless Steel

Manufacturing Capability

Production Capacity

110 sets
Injection Machines

400
Employees

Industry Experience	25 years
---------------------	----------

Compliance & Quality

Our products meet international standards including CE, UL, and REACH, utilizing high-grade Nylon 66 materials.

Certifications & Standards	TS 16949, BSCI, ISO 9001, UL, GS, CE, DNV, REACH
----------------------------	--

Product Features

Key Features

- Self-locking mechanism for secure fastening
- Corrosion-resistant stainless steel body
- Protective coating against abrasion
- Visual identification through various colors
- Suitable for environmental protection
