

Coaxial Audio Cable with RCA Connectors

Coaxial audio cables with RCA connectors transmit audio signals between devices. Color-coded connectors ensure easy identification and proper connection for home entertainment systems.

Product Overview

Professional Audio Connectivity

This high-quality coaxial audio cable is designed for reliable signal transmission between home entertainment components. Featuring a 2RCA to 2RCA configuration, it is ideal for connecting devices such as DVD players, stereo systems, and televisions. The cable is built with a 3.0mm outer diameter, ensuring flexibility and ease of installation in various home audio setups.
