

Coaxial Audio Video Cable

Coaxial cable designed for audio and video signal transmission. It features a central conductor, insulation, braided shield, and protective outer jacket.

Product Overview

Professional Coaxial Audio Video Cable

This high-quality coaxial cable is engineered for reliable audio and video signal transmission across a variety of professional and consumer electronic applications. Designed with a robust central conductor and a protective braided shield, it effectively minimizes signal interference and loss. It is an ideal solution for connecting antennas, cable boxes, and diverse audio-visual equipment setups.

Technical Construction

Key Features

- Central conductor for signal transmission
- Insulated core design
- Braided shield for interference rejection
- Durable outer jacket for protection

Applications

Common Applications

Antenna Connection, Cable Boxes, Audio-Visual Equipment, Signal Transmission
