

Coaxial Audio Video Cable Assembly

This specialized cable is designed for combined audio and video applications. It features a coaxial component alongside additional conductors for power or auxiliary signals, bundled in a single assembly.

Product Overview

Professional AV Cable Assembly

This specialized coaxial audio-video cable assembly is engineered for high-performance signal transmission in professional environments. Featuring a robust coaxial core paired with two auxiliary conductors, it efficiently handles audio, video, and power or control signals within a single, streamlined cable. The construction includes advanced shielding and insulation, ensuring reliability and minimal interference for critical applications.

Technical Specifications

Cable Configuration

- 1x Coaxial component
- 2x Auxiliary conductors

Shielding

Braided shield

Primary Applications

Audio Transmission, Video Transmission, Power Delivery, Control Signals

Construction

Design Features

Integrated Power/Control • Interference Rejection • Insulated Conductors
