

Coaxial Cable Adapter

This coaxial cable adapter is designed for secure and reliable signal transmission. It features a durable construction with a metallic interface and a protective plastic outer casing.

Product Overview

High-Quality Coaxial Connection

The OC 5091 is a professional-grade PAL male coaxial cable adapter designed for secure and reliable signal transmission. Featuring a solderless design, it allows for easy installation with minimal tools, making it ideal for both professional AV setups and home use. Its durable construction ensures a stable connection that minimizes signal loss and interference for televisions and set-top boxes.
