

# Coaxial Cable for Audio and Video

Coaxial cables are designed for high-quality audio and video signal transmission. The shielded design minimizes interference and ensures optimal signal clarity for connecting audio and video devices.

## Product Overview

### High-Quality Audio/Video Connectivity

These coaxial cables are engineered for reliable audio and video signal transmission across a variety of home entertainment devices. Featuring a durable, shielded construction, they are designed to minimize signal interference and maintain optimal clarity. This 2RCA to 2RCA cable configuration is ideal for connecting components such as DVD players, televisions, and amplifiers.

## Technical Specifications

Model Number	F-632
Connector Type	2RCA to 2RCA
Outer Diameter	3 mm
Core Configuration	x2C

## Features

### Available Colors

Red • Black

### Key Features

Shielded Design, Durable Construction, Audio/Video Compatible
