Product Overview

Professional Grade Coaxial Antenna Cable

This premium coaxial cable is engineered for superior signal transmission, ensuring clear and consistent picture quality for television and satellite systems. Featuring a durable, robust construction, the cable is built for longevity and reliable signal integrity in professional installations. The assembly comes equipped with high-quality nickel-plated F-connectors, providing a secure, threaded interface that is easy to install across a wide range of video equipment.

Technical Specifications

Shielding Performance

105 dbA

Shielding Efficiency

Compliance

Compliant

Key Features

Nickel-plated F-connector, Threaded interface, High signal integrity, Robust construction

Design and Compatibility

Physical Appearance

- Color: Black
- Connector base: Green ring indicator

Common Applications

- Television signal distribution
- Satellite receiver connection
- RF signal transmission
