

Coaxial Cable with F-Connectors

Coaxial cable with F-connectors is designed for reliable signal transmission in television and satellite applications. It features durable construction and precise impedance matching for optimal performance.

Product Overview

Reliable Coaxial Connectivity

This high-quality coaxial cable is engineered for consistent signal transmission in television and satellite applications. Featuring durable construction and precise impedance matching, it ensures optimal performance for your AV equipment. It is an ideal solution for connecting TVs, satellite receivers, and other audio-visual devices.

Technical Specifications

Model Number	F-212
Connector Configuration	RF-Male, RF-Female
Outer Diameter	7 mm
