

# Coaxial Cable

This is a coaxial cable designed for communication purposes. It features multiple layers, including a central conductor, insulation, a braided shield, and an outer jacket.

## Product Overview

### High-Performance Coaxial Cable

This coaxial cable is engineered for reliable signal transmission, featuring a robust multi-layer construction. It includes a central conductor protected by high-quality insulation, a braided shield for interference protection, and a durable outer jacket. Designed to meet industry standard JIS C3502, it is suitable for various communication and signal applications.

#### Cable Type

Coaxial

## Technical Standards

#### Compliance Standards

JIS C3502

## Construction Details

#### Cable Construction

- Central conductor
- Insulation layer
- Braided shield
- Outer protective jacket
