

Cocoa Bean Processing Line

This cocoa processing machinery is made of stainless steel and uses advanced technology. Its output is customizable, and the system is easy to clean.

Overview

Professional Cocoa Bean Processing System

This automated cocoa bean processing line is a complete, industrial-grade system designed for the efficient transformation of raw cocoa beans into high-quality cocoa products. The line incorporates critical stages including cleaning, roasting, winnowing, grinding, pressing, and powdering. Engineered with durable 304 stainless steel, the system ensures hygiene, easy maintenance, and consistent performance for large-scale production facilities.

Technical Specifications

Processing Stages

- Cleaning
- Roasting
- Winnowing
- Grinding
- Pressing
- Powdering

Material Construction

304 Stainless Steel

Key Features

Automated System, Precise Temperature Control, High Cocoa Butter Yield, Easy to Clean, Waste Reduction

Performance

Customization

Customizable Output
