Product Overview

Professional Bean Roasting & Drying

This versatile roasting machine is expertly designed to process a variety of beans, including cocoa, soybeans, and mung beans. Built with a focus on durability and operational efficiency, it utilizes a high-quality stainless steel drum construction that significantly outperforms traditional mesh designs. The unit also features an exclusive manual clutch system, ensuring that material can be safely released even in the event of a power outage.

Suitable Materials

Cocoa Beans, Soybeans, Mung Beans

Construction & Design

Drum Material	Stainless Steel
Drum Construction	Punched Plate
Front Ring Thickness	4 mm
Durability Comparison	5x longer lifespan compared to stainless steel mesh
Clutch Design	Manual clutch for power outage protection

Service & Support

Warranty	1 Year
Maintenance	Lifelong maintenance support
