

Coiled Broadcast Cable

This is a coiled cable designed for broadcast applications. It has black protective ends for strain relief and connection points.

Product Overview

Professional Broadcast Connectivity

The Coiled Broadcast Cable is engineered for reliable signal transmission in demanding radio and television broadcasting environments. Its coiled design offers excellent flexibility and cable management, ensuring a tangle-free setup during live productions. Designed with durability in mind, the cable features reinforced protective ends that provide essential strain relief for long-term use.

Key Features

Attributes	Broadcast Grade, Strain Relief, Flexible Design, Professional Audio/Video
------------	---

Technical Details
