

Coiled Immersion Heater

This immersion heater is designed with a coiled tubular heating element for efficient liquid heating. It features a threaded connection for easy mounting in tanks and vessels used in various industrial heating processes.

Product Overview

Industrial Immersion Heating Solution

This coiled immersion heater is specifically engineered for efficient liquid heating within industrial tanks and vessels. Featuring a robust tubular heating element and a secure threaded connection, it is designed to withstand demanding operational environments. This versatile component is ideal for various heating processes and integration into complex heat exchange systems.

Technical Specifications

Heater Type	Coiled Tubular Immersion Heater
Mounting Connection	Threaded

Application & Usage

Key Features

- Robust industrial construction
- Coiled tubular heating element design
- Threaded mounting for secure installation

Suitable Applications	Liquid Heating, Tank Heating, Vessel Heating, Heat Exchange Systems
-----------------------	---
