

Coiled Pneumatic Air Hose

Coiled air hose is designed for use with pneumatic tools. Its coiled construction allows for convenient storage and prevents tangling.

Product Overview

High-Performance Coiled Pneumatic Hose

This coiled pneumatic air hose is engineered for professional environments, utilizing high-grade polyurethane (PU) for superior durability. Designed to resist abrasion, tearing, and impact, it ensures reliable performance in demanding industrial settings. The coiled structure provides efficient storage and tangle-free operation, making it an ideal solution for workshops and garages.

Technical Specifications

Material	Polyurethane (PU)
Minimum Working Temperature	-40 °C
Maximum Working Temperature	80 °C

Product Features

Available Colors

Orange • Blue • Black • Transparent

Key Strengths

Abrasion Resistant, Tear Resistant, Impact Resistant, Stable Performance

Market Positioning

Market Grade

Middle and High-grade
