

Coin-Operated Digital Tire Inflator with Air Compressor

This coin-operated digital tire inflator is designed for outdoor use and features a built-in air compressor. The digital display allows for easy pressure setting and monitoring.

Product Overview

Professional Automatic Tire Inflation

This coin-operated digital tire inflator is engineered for high-traffic outdoor environments such as gas stations, service centers, and parking facilities. Featuring a built-in air compressor and a precise digital interface, it ensures accurate tire pressure management for a wide variety of vehicles. Its robust construction is designed to withstand outdoor conditions, providing a reliable and convenient self-service solution for end-users.
